UNI-LIFT INTRODUCES WEB-BASED CONFIGURATOR

BROADVIEW, IL, Extending its leadership in the linear actuator market, Uni-Lift has introduced its new web-based Configurator tool. This web-based program can be accessed by going to the Uni-Lift website www.tkunilift.com and will give a user the ability of designing a jack to fit a specific application.

The new Uni-Lift Configurator replaces complicated mathematical formulas with easy to answer questions to configure the jacks or jack that would be needed to run your specific application. The graphic interface helps the user to configure the correct type of jack. For beginners a step by step tutorial is supplied on the website as well as a complete hyper-linked glossary of the terms used in the configurator. The Uni-Lift Configurator will supply engineering drawings as well as CAD files that can be inserted into a final drawing. The user can also email a Uni-Lift Engineer at any time during the process, as well as saving each project to use as reference or if a change needs to be made.

Like all Uni-Lift products, the new Uni-Lift Configurator is dependable and supported by Uni-Lift support staff.

For more information and a free catalog, call 1-800-275-5225. Fax 1-708-865-0894. Or write to Uni-Lift, 2525 Gardner Road, Broadview, Illinois 60155. A copy of the

catalog can also be downloaded from the Uni-Lift website
www.tkunilift.com.
